

MAIN QUOTE

“I built EducateShala as a
working school management MVP app
for this hackathon, with an
AI School Admin Assistant module inside it.”

NARRATIVE

The Administrative Burden in Modern Schools

School administrators spend countless hours on repetitive, manual tasks that pull focus from what matters most — student learning and school improvement.

- 

01

NOTICES

Drafting, formatting, and sharing notices for events, holidays, and updates.
- 

02

SUMMARIES

Compiling reports and summaries across classes, departments, and terms.
- 

03

ATTENDANCE

Recording, validating, and reconciling daily attendance across multiple classes.
- 

04

FEEES

Tracking payments, reminders, receipts, and outstanding dues.
- 

05

EXAMS

Scheduling, seating plans, marks entry, and result compilation.

These manual workflows consume time, increase errors, and delay decisions that impact students and staff.

Manual Processes • Fragmented Data • Time-Consuming • Error-Prone

EducateShala — Working School Management MVP

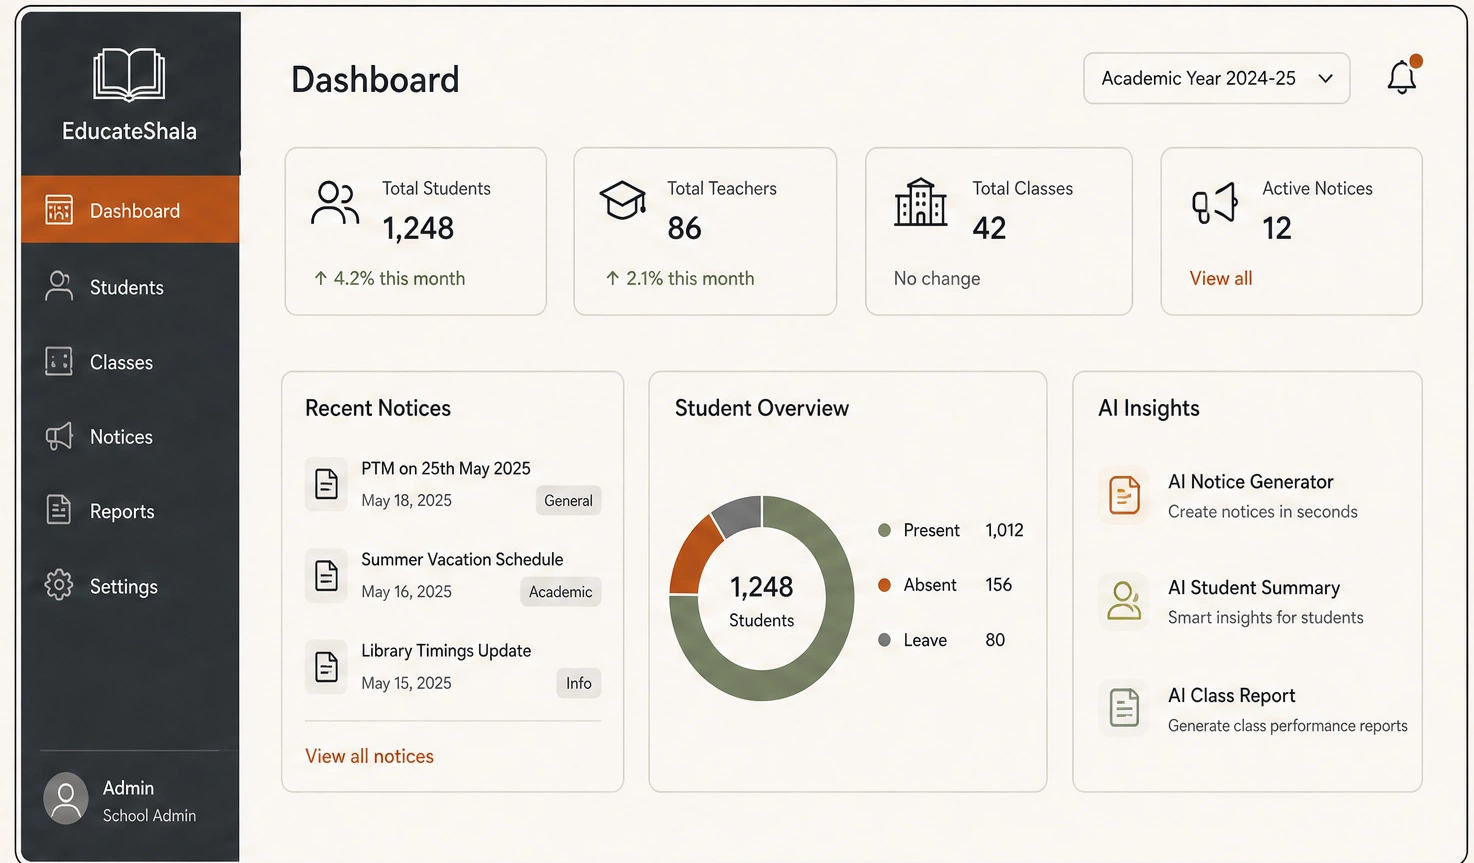

01 — Role-based dashboard

02 — Student management

03 — AI Notice Generator

04 — AI Student Summary

05 — AI Class Report

OUR STACK

Built with a Practical PHP + MySQL Stack.

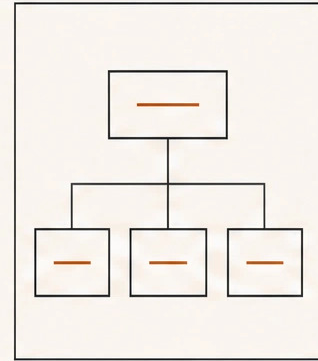

A reliable, efficient, and secure stack designed to power EducateShala's school management MVP.

STACK OVERVIEW

01 Frontend

- HTML
- CSS
- JS

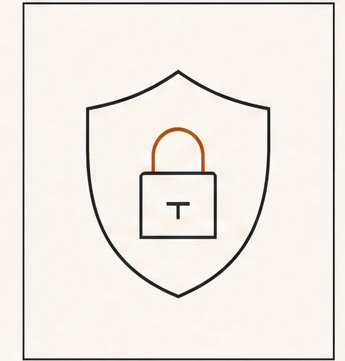

02 Backend

- Core PHP

03 Database

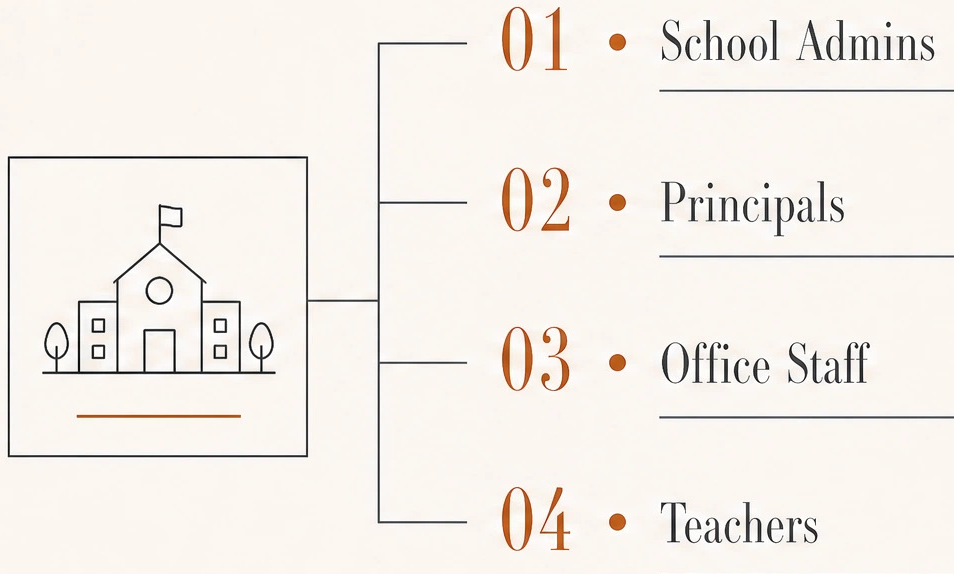

- MySQL

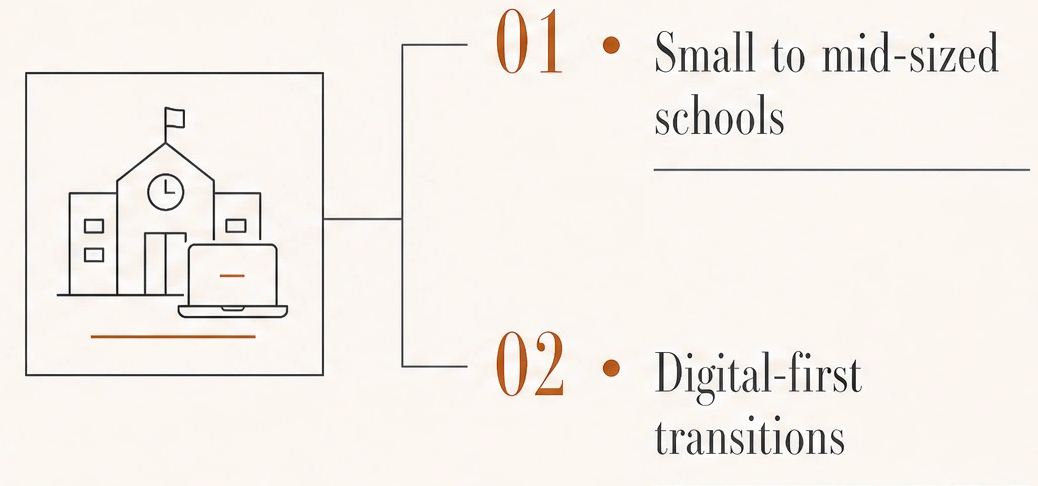

04 Security

- JWT
- Role-based access

PRIMARY BENEFICIARIES

BEST-FIT SCHOOLS

VALUE PROPOSITION:

Save time, reduce repetitive work, and improve daily operations.
